PROFESSIONAL SUMMARY

Security-minded Full-Stack Developer and Data Practitioner with expertise in building access-controlled Next.js web applications, high-performance product UIs, REST APIs, and applied machine learning models. Proficient in full-stack architecture, application security (OWASP Top 10, RBAC, Supabase RLS policies), Python data pipelines, and end-to-end model evaluation. Passionate about shipping robust, production-ready software.

TECHNICAL COMPETENCIES

Frontend & UI:	React, Next.js (App Router), TypeScript, Tailwind CSS, Responsive Design, Accessibility
Backend & APIs:	Node.js, REST APIs, PostgreSQL, Supabase, Prisma, Auth & Session Management
AppSec:	OWASP Top 10, Auth & RBAC Design, Supabase RLS Policies, XSS/SQLi Prevention, Code Review
Data & ML:	Python, Pandas, Data Analysis, ML Model Training, Data Storytelling, Jupyter Notebooks
Tools & Delivery:	Git, GitHub, Vercel, Postman, CI/CD Workflows, Technical Documentation

FEATURED PROJECTS & CASE STUDIES

- Aurora Analytics** — *Multi-Tenant Analytics Platform* (Next.js, TypeScript, Supabase RLS, Charts)
- Architected multi-tenant workspace with database-level isolation via Supabase RLS policies, preventing cross-tenant data leaks and rendering sub-400ms metrics dashboards.
- Nova Commerce** — *Headless Storefront & Checkout* (Next.js (ISR), Stripe, Tailwind CSS)
- Implemented high-performance storefront with Incremental Static Regeneration (ISR), custom shopping cart state, and server-side signed Stripe payment flows with price-tampering shields.
- Pulse Support Chat** — *Edge Streaming Support Assistant* (React, Node.js, Server-Sent Events)
- Built embeddable chat widget with edge-streamed LLM token delivery (<150ms TTFT), client-side markdown parsing, and rate-limiting safeguards.
- Ops Status Console** — *Incident & Service Health Dashboard* (Next.js, PostgreSQL, JWT Auth)
- Designed minimalist operational status console aggregating service health scrapers and chronological incident logs with 50ms query responses.

WORK EXPERIENCE

- Full-Stack Developer • AppSec & Data Focus** — Product & Client Projects (2024 – Present)
- Owned feature slices across Next.js UI, API routes, and database access layers, enforcing RBAC and Supabase RLS policies.
 - Performed application security reviews on REST APIs and route handlers, eliminating authorization logic flaws.
 - Applied Python and Pandas for data analysis tasks: cleaning datasets, training ML models, and generating actionable reports.
- Junior Full-Stack Developer** — Freelance & Open Source Projects (2023 – 2024)
- Shipped responsive marketing and web app UIs with accessibility and SEO best practices.
 - Built RESTful endpoints, database schemas, and data pipelines for client projects.

EDUCATION

- Computer Science Studies** — Self-Directed & Applied Project Work (*Larkana, Sindh, Pakistan*)
- Comprehensive coursework and hands-on projects spanning full-stack development, application security, and applied data science.
